Installation

1 Preparation

Make sure Chroma and millwork are free from dirt and debris.

2 Apply Adhesives

a Apply 1" x 1" Piece of VHB tape in six (6) places on millwork.

b Apply quarter sized dab of clear silicone in six (6) places.
Installation

3 Place Panel

Make sure all tape sticks properly until silicone dries. Tape or clamp as needed to achieve good adhesion.
Installation

4 Connect Electrical

Have a qualified electrician connect the wiring and test lighting.
