## For Each Additional Panel

- (x1) Varia Panel
- (x1) Beam Profile – 96" 0-15-0126
- (x1) Top Cap KIT 3-15-0139-K
- (x1) Versa 6" Dia. 2-Part Baseplate for Concrete KIT 3-15-1941-K
- (x1) Beam Base Cover KIT 3-15-1939-K
- (x8) 2-Piece Clamping Bracket KIT 3-15-1752-K
- (x2) Slot Cover 3-15-1732
Overview

Versa is a popular system that uses aluminum extrusions to add rigidity to panels. With the 200.39 installation, the base is bolted to floor and covered using the base covers. Slot covers are used to conceal exposed slots. The material is then suspended using the 2 piece clamping brackets.
Installation

Required Tools

Drill

Hammer Drill

11/64" Bit

#3 Square Head Bit

Saw

Masonry Bits

Rubber Mallet

Metric Allen Wrenches
1 Attach Baseplate to Extrusion (Tapped at Center End)

a  
* Complete this step for each extrusion.

b  
* Complete this step for each extrusion.
Installation

2 Slide on Cover Plate and Attach Side Clamping Brackets

a  * Complete this step for each extrusion.

b  * Complete this step for each extrusion.
Installation

3 Install Panel

Installation

5 Install Concrete Anchors

- Drill Ø10mm hole, minimum 65mm deep.
- Remove drilling debris with a blowout bulb or with compressed air.
- With screw in anchor (3-15-3011A), use a hammer to insert anchor.
- Place a washer under the screw head.
- Torque the screw to 15 Nm.
- Remove screw.
