Product Description and Specifications

Features and Benefits
• 15 color options
• 6 base patterns
• Noise Reduction Coefficient (NRC) up to 0.35
• Cost-effective decorative feature
• Easy to specify
• Easy to install

Cleaning Instructions
Hush Clad Panels should be cleaned periodically. A regular, seasonal cleaning program will dramatically help prevent noticeable weathering and dirt build-up.

To remove airborne debris and dust, it is recommended to periodically vacuum Hush Clad Panels. Please note the slight shedding of fibers from the Felt is normal and not indicative of any defect.

To treat liquid stains, remove spills immediately using a clean damp cotton cloth or with detergent soap and warm water. Carpet and fabric cleaners can usually be used; always test an inconspicuous area before the actual stain.

Do:
• Vacuum or use a soft brush to clean Hush Clad Panels.

Do not:
• Use strong solvents, highly alkaline or abrasive cleaning agents.
• Do not completely saturate module with cleaning solution or water.

Available Finishes
Hush Clad Panels can be specified in any of 3form’s 15 Sola Felt options.

Solution

RTG 300.44: 44"×96"
Installation

Required Materials

- Level
- Heavy Duty Construction Adhesive
  *Liquid Nails LN-903
- Caulking Gun

1. Mark Location to Install on Wall

Make sure line is level.
Installation

2 Unfold Panel

a

*The fold line as a default will be 48” down from the top edge of the panel, regardless of the size ordered.

b

3 Apply Adhesive to Back of Panel

Apply around perimeter ½” from edge and in stripes approximately every 12”.

*If a less permanent installation is desired, install ⅛” MDF to wall first, then install Panel directly to the MDF
Installation

4 Install on Wall

*Align panels prior to the adhesive curing!*
Some shimming could be required for panels to align and sit flat, depending on the flatness of the wall surface.

5 Install Additional Panels

Repeat Steps 2-3 for additional panels ensuring the panels are aligned prior to the adhesive curing.
